Bacteria and viruses are two important microbes. Bacteria are very small. They have only one cell. They can live (٤٠) _____. Bacteria aren't all bad; (٤١) _____ you couldn't live without some bacteria.

Viruses are smaller than bacteria. They are (٤٢) _____ from bacteria because they need to be inside a (٤٣) _____ to live and grow. There aren't many good things about viruses – as Corona virus, they usually (٤٤) _____ your body and make you sick.

Q

Reading

۳

- Read the passage, then answer its questions.

Today, there are some endangered animals on Earth. It means that we can find only a few of them around us. Some examples are whales, pandas, tigers and Asian elephants.

Humans destroy the natural homes of the animals in the forests, lakes, and plains. When the number of people on Earth increases, they need more places for living. They cut down trees and destroy lakes. They make homes and roads instead. Then the animals won't have a place to live. They will die out.

The Iranian cheetah is among these animals. This wild animal lives only in the plains of Iran. Now there are only a few Iranian cheetahs alive. If people take care of them, there is hope for this beautiful animal to live.

Recently, families pay more attention to nature, students learn about saving wildlife, and some hunters don't go hunting anymore. In this way, the number of cheetahs is going to increase in the future.

٤٥. Which of the following is not an endangered animal?

- a. whale b. panda c. African elephant d. tiger

٤٦. Destroying lakes and forests harms wildlife because _____.

- a. it increases the number of people
b. animals won't have a place for living
c. humans make roads and homes instead
d. students can't learn about saving wildlife

٤٧. The underlined word "them" in paragraph three refers to _____.

- a. plains b. people c. Iranian cheetahs d. animals

٤٨. Complete the sentence according to the passage:

"If people don't take care of animals, they will _____."

٤٩. Today, there aren't any endangered animals on Earth. True False
٥٠. Plains are the natural homes of Iranian cheetahs. True False

GOOD LUCK!
